AI engineer with 3+ years of experience at Goldman Sachs, building AI/LLM platforms, agentic workflows, and event-driven publication systems for investment research teams. Skilled across Python, Java, React, Spring Boot, Kafka, MongoDB, AWS, and modern LLM tooling, including LiteLLM, Google ADK, LangChain, and MCP.

EDUCATION

Pune Institute of Computer Technology

Pune, India

Bachelor of Engineering in Information Technology | CGPA: 9.38/10

May 2023

(Honors with specialisation in AI-ML)

Relevant Courses: Data Structures and Algorithms, Operating Systems, Computer Networks, Cloud Computing, Deep Learning

SKILLS

Languages: Python, Java, C++, JavaScript, TypeScript, HTML, CSS

Backend/Infra: Spring Boot, Kafka, MongoDB, Docker, Terraform, AWS, Linux

AI/ML: LiteLLM, LangChain, Google ADK, MCP, TensorFlow, PyTorch, SageMaker

Frontend: React, TypeScript

Tools: Git, Jira, Confluence, Grafana, Agile

EXPERIENCE

Goldman Sachs

Bangalore, India

Associate

Jan 2026 - Present

- Led end-to-end design and deployment of Relay Copilot, a suite of AI agents that automate research utilities and supervisory validation workflows for analysts, using LiteLLM, Google ADK, and MCP.
- Partnered with research analysts and supervisory stakeholders to identify publication bottlenecks and deliver automation workflows that reduced publishing turnaround time by 20%.

Analyst

July 2023 - Dec 2025

- Owned full-stack development of GIRAF Console, an internal LLM playground that enabled research analysts to test and interact with deployed models, including Llama 2 and Flan-T5. Built the UI using React and TypeScript and integrated models hosted on AWS SageMaker.
- Modernised legacy disclosure-generation systems by migrating core workflows to an event-driven architecture using Kafka, MongoDB, and Spring Boot, improving scalability and reliability of publication infrastructure.

Summer Intern

June 2022 - Aug 2022

- Developed an automated PowerPoint-generation utility that converted research reports into formatted presentation files upon publication using AWS Lambda.
- Enhanced client-facing alert and email features on the research portal.

Achievements

Patent

- Video Conferencing Utility for the Deaf and Dumb**, Indian Patent Application No. 202321051148, Journal No. 37/2023, published Sep 15, 2023.

Publications

- [Aikyam: A Video Conferencing Utility for the Deaf and Dumb](#)
- [Study and Survey on Gesture Recognition Systems](#)

Awards

- Goldman Sachs Gives – Analyst Impact Fund:** Placed 5th globally and won a \$5,000 grant for a partner NGO after pitching a philanthropic initiative to Senior Partners.

PROJECTS

Aikyam

Sep 2023

- Built a PyQt5 application that translates Indian Sign Language gestures into spoken sentences during Google Meet, Zoom, or Teams calls, achieving 91.66% accuracy and 0.0866s inference latency.
- Implemented real-time gesture recognition using landmark detection, LSTMs, and Transformers to interpret user gestures and generate natural-language sentences.

GANny bird

Aug 2021

- Trained a GameGAN-style PyTorch model to simulate Flappy Bird gameplay from image frames and keystroke data, without hardcoded game mechanics.
